

ROCKERGLIDE: OTHERS SAY IT BEST

It's About Quality of Life!

“The *RockerGLIDE*™ is a big HIT here!
We placed it outside for the summer.

The glider is a great asset by giving residents a comfortable place to socialize.

The rocking action is **soothing and relaxing**.
“I love to meet my friends by the swing!”

They line up every day. Due to its demand, we sometimes have to put up a **sign up sheet**, just to make sure all get a turn!

They absolutely love it and are proud to show it off to their visiting families.”

– *Michael Lorenz*, Housing Director
The Alton Memory Care, St Paul, Minnesota

“The *RockerGLIDE* is a **very cost-effective** way to reduce agitation, which is common in dementia. Residents gravitate to this **great gathering spot**. It is just plain fun!”

– *Sharon Claflin*, Nurse Manager
Wealshire of Bloomington, Bloomington, Minnesota

“Frequently we transfer **wheelchair users** onto the *RockerGLIDE*.

All who use it love the experience.

Their smiles tell the whole story!”

– *Michelle Zieger*, Program Supervisor
Midwest Special Services, A Training and Day Care Center
St. Paul, Minnesota

“I LOVE the new *RockerGLIDE*!

The **constant motion stimulates** the cerebral cortex, thereby increasing a person's ability to focus and concentrate, and assists them to relax.

Gliding can help **decrease agitation**. Constant gliding motion helps those with **pain, dementia of any kind, and a number of other conditions**.

We are all looking for ways to decrease psychoactive drugs, and relieve pain.

Gliding is an answer!!”

– *Sherrie Dornberger*, RN,
GDCN, CADDCT, CDP, CDONA
NADONA*/ LTC Executive Director, Cincinnati, Ohio

* National Assn of Directors of Nursing
Administration / Long Term Care
